

Accessories for the Neutral Supply Tester

08757 or 09070 Neutral Supply Tester

Female neutral clip

Female active probe

Neutral Supply Testers are used by accredited meter installers when placing smart meters on domestic and commercial switchboards. The NST shows a safe or unsafe condition by measuring the voltage and impedance in relation to the connected active, neutral and reference earth.

The NST kit consists of the NST unit, lead set, hanging clip and user manual. Stock code 08757 refers to the M1121 for use in New South Wales only, stock code 09070 refers to the M1120 for use in Queensland, Victoria and South Australia.
